

AMENDMENTS TO THE SPECIFICATION

Please amend the below paragraph as follows:

[0039]

In Fig. 6a, when the mobile phone 5 is distributed with video information based on push technology, verification is made about whether or not the mobile phone 5 is being used (Step S41). In case that the mobile phone 5 is being used by the user, the received videovideo information is saved immediately (Step S43). Further, in case that the mobile phone 5 is not being used by the user, the distributed video information is displayed for only a predetermined time period (Step S42). In case that the distribution of the video information is continued even after the predetermined time period has elapsed, displaying the video information is stopped and the remaining video information distributed after the predetermined time period has elapsed is saved (Step S44). Thereafter, in case that the user desires to see the remaining video information, the user can reproduce and see the saved remaining video information according to an operation at the time of reproducing the video information shown in Fig. 6b.
